DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a process for converting carbonaceous feedstocks into energy without the production of unwanted greenhouse gas emissions, classified in class 429, subclass 13 or 50.
 - II. Claims 17-31, drawn to a system for converting carbonaceous feedstocks into energy without the production of unwanted greenhouse gas emissions, classified in class 429, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus or by hand, for example (*as disclosed in the Background of the Invention*) the process can be practiced by using an air separation plant to use pure oxygen, or by utilizing advanced thermodynamic combined cycles, turbo-generators, improved condensers and cooling towers; or by combining the use of advanced high temperature turbo-generators and fuel cells; or by conventional gas separation technologies; or by employing a scrubber to scrub the CO₂ from stack gases to chemically react the recovered CO₂.

Art Unit: 1745

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
